IMMEDIATE RELEASE

Retaining Role in Microsoft Partner Network

Renewed Gold Status for DocuWare

New Windsor NY, – March 14, 2013– DocuWare, a global leader in the document management industry, has renewed its status as a Microsoft Gold Partner by meeting all criteria for the fifth time.

DocuWare is one of Microsoft's select partners, and in order to achieve its Gold Status again, the company had to fulfill the rigorous requirements of Microsoft's partner program. This included proving technological expertise and documenting numerous successful customer references. In addition, tests were conducted to determine how the Document Management System (DMS) performs on Microsoft's newest platforms.

Customers Benefit from DMS Compatibility

In return, DocuWare is able to tap into exclusive services from Microsoft to continue to develop its software solutions at the highest level. Customers benefit from the guarantee that core DocuWare technology is based on the highest standards and integrates easily into any existing Microsoft environment. In addition, Microsoft helps the DMS specialist within the framework of the Gold Partnership to provide the best possible support services to customers.

About DocuWare

From Documents to Value: DocuWare enables any size organization - in any industry - to transform documents into valuable capital. Regardless of format or source DocuWare automates business processes and workflows by electronically managing and sharing documents. Documents are readily available, where and when needed; one search quickly locates related documents.

Whether as an on-premise or as a cloud solution, DocuWare provides all the components needed for Enterprise Content Management. These solutions are highly scalable, offer a low Total Cost of Ownership (TCO) and DocuWare is ISO Certified, FDA Compliant and rated 5-Star by Buyers Lab Inc. (BLI).

DocuWare (founded 1988) ranks among the world's leading Document Management software companies. The company operates worldwide from Germering near Munich and from New Windsor, New York with subsidiaries in the UK, Spain and France. Its products are available in 70 countries and 16 languages to over 100,000 users in approximately 10,000 installations.
