

“Technology is constantly evolving. I take great care in staying on top of that rapid change, not only for Smile, but also for our customers. That mindset, coupled with a team of talented and equally caring people at Smile, ensures that we can provide a superior customer experience in an ever-evolving IT world.”

BOB LEWIS
CIO OF SMILE

SUCCESS:

I started my time here at Smile as a Help Desk Supervisor. Over the last 8 years, I moved through the organization in varying roles to my current position as CIO. I have had great internal success implementing systems that have created positive ROI and increased employee's productivity through ease of access to technology and automated processes. Working with my team, we have built a Managed Service practice, in house, from the ground up and now have NOC supporting multiple technology platforms. We have a wonderful group of hard working people and an owner who cares for our employees. I am proud to work with them all and feel our future is very bright.
