

RETURN TO THE OFFICE WITH CONFIDENCE

As organizations prepare to bring employees back to the office there may be safety concerns when it comes to the use of shared office equipment. Figuring out how and which tools can assist employees safely and confidently without compromising productivity and collaboration is quickly becoming a priority.

The Challenge:

Organizations need to provide touch-free, safe work environments without compromising productivity

Sharp Can Help

Hands-free, voice-first operations: Using the power of natural language, Sharp offers voice operation for copying and scanning by minimizing touch interactions with shared office equipment.

Use your mobile device: Personal devices such as smartphones can be an alternative method to operate shared devices. Synappx Go helps users safely operate shared office equipment using their mobile devices.

Hands-free, Voice-First Operations

Interacting with your Sharp copiers can be done safely. Regardless of your familiarity with how a Sharp copier operates, you can control the copier using the power of your voice.

Simply ask the copier:

- "Alexa, ask SHARP Copier to copy"
- "Alexa, ask SHARP Copier to scan document to me"

Contactless Operation with Smartphones

Synappx Go helps you do more as you move through your day, all from your phone. Make your workplace smarter and safer, leveraging the technology you have in place to facilitate spontaneous collaboration.

- Allow contactless operations on commonly-shared devices:
 - Print files from cloud storage
 - Print release to prevent other people from picking up the outputs
 - Scan documents to your favorite destinations, cloud storage and to yourself
- Set pre-set personalized scan and print settings using smartphones. Just use the app, no need to learn the equipment
